4. FIRST AID MEASURES

Emergency and First Aid Procedures:
- Inhalation:
  If user experiences breathing difficulty, move to air free of vapors. Administer oxygen or artificial medical assistance can be rendered.

- Skin Contact:
  Wash with soap and large quantities of water and seek medical attention if irritation from contact persists.

- Eye Contact:
  Contact lenses should be removed immediately. Flush with large quantities of water for at least 15 minutes and seek immediate medical attention.

- Ingestion:
  Call your local poison control center, hospital emergency room or physician immediately for instructions to induce vomiting.

5. FIRE FIGHTING MEASURES

Flash Pt:
- No data.

Explosive Limits:
- LEL: No data.
- UEL: No data.

Autoignition Pt:
- No data.

Suitable Extinguishing Media:
- Use carbon dioxide, dry powder, or foam.

Fire Fighting Instructions:
- Self-contained respiratory protection should be provided for fire fighters fighting fires in buildings or confined areas. Storage containers exposed to fire should be kept cool with water spray to prevent pressure build-up. Stay away from heads of containers that have been exposed to intense heat or flame.

6. ACCIDENTAL RELEASE MEASURES

Steps To Be Taken In Case Material Is Released Or Spilled:
- Clean up:
  Keep unnecessary people away; isolate hazard area and deny entry. Stay upwind, out of low areas, and ventilate closed spaces before entering. Shut off ignition sources; keep flares, smoking or flames out of hazard area.

  Small spills:
  Take up with sand, earth or other noncombustible absorbent material and place in a plastic container where applicable.

Respiratory Equipment (Specify Type):
For OSHA controlled work place and other regular users. Use only with adequate ventilation under engineered air control systems designed to prevent exceeding appropriate TLV. For occasional use, where engineered air control is not feasible, use properly maintained and properly fitted NIOSH approved respirator for organic solvent vapors. A dust mask does not provide protection against vapors.

Eye Protection:
Safety glasses, goggles or face shields are recommended to safeguard against potential eye contact, irritation, or injury. Contact lenses should not be worn while working with chemicals.

Protective Gloves:
Wear impermeable gloves. Gloves contaminated with product should be discarded. Promptly remove clothing that becomes soiled with product.

Other Protective Clothing:
Various application methods can dictate use of additional protective safety equipment, such as impermeable aprons, etc., to minimize exposure. A source of clean water should be available in the work area for flushing eyes and skin. Do not eat, drink, or smoke in the work area. Wash hands thoroughly after use. Before reuse, thoroughly clean any clothing or protective equipment that has been contaminated by prior use. Discard any clothing or other protective equipment that cannot be decontaminated, such as gloves or shoes.

Engineering Controls (Ventilation etc.):
Use only with adequate ventilation to prevent build-up of vapors. Open all windows and doors. Use only with a cross ventilation of moving fresh air across the work area. If strong odor is noticed or you experience slight dizziness, headache, nausea, or eye-watering - Stop - ventilation is inadequate. Leave area immediately.
